PROFESSIONAL SUMMARY

PMP® certified Senior Program Manager with 12+ years of experience in PMO governance, program execution, and operational transformation across multi-location, high-complexity environments. Proven expertise in building governance frameworks, MIS reporting systems, risk registers, and execution controls that drive performance visibility and strategic alignment. Experienced in managing 500+ stakeholder ecosystems across cross-functional, distributed environments. Targeting Enterprise PMO, Program Governance, and Transformation roles within BFSI GCCs.

CORE COMPETENCIES

PMO Governance & Execution Control	Risk, Issue & Dependency Management	Strategic Planning & Execution
Program & Project Management	Performance Tracking, MIS & Reporting	Cross-Functional Team Leadership
Stakeholder & Leadership Management	Greenfield PMO Setup & Transformation	Operations Management & Process Optimization

SKILLS & TOOLS

Power BI – Dashboarding & Reporting	Advanced Excel – Data Analysis & Automation	Jira – Workflow & Issue Tracking
Microsoft Project & SharePoint	Confluence & Google Workspace	PMO Governance & MIS Frameworks

PROFESSIONAL EXPERIENCE

PMO Consultant & Governance Lead

Independent Consulting
Engagement

Nov 2025 – Present |
Hybrid, Pune

- Architected PMO governance framework for a greenfield multi-function organization — establishing SOPs, RACI structures, execution controls, and performance reporting across Finance, HR, Operations, and Marketing verticals
- Built end-to-end MIS and reporting infrastructure enabling real-time leadership visibility across 100+ stakeholder ecosystem
- Designed risk identification and issue escalation protocols ensuring structured governance across parallel workstreams
- Standardized cross-functional delivery processes — reducing execution gaps and improving accountability across teams
- Served on Strategic Management Committee — contributing to governance decisions, operational policy, and organizational direction

Key Impact: Transitioned organization from zero-structure to a governed, scalable PMO model — enabling consistent execution across 4 functional verticals within 6 months.

Program & Operations Manager – Multi-Site Execution

Independent Project Engagements

Jun 2022 – Oct 2025 |
Hybrid, Pune

- Managed end-to-end execution across multiple concurrent programs, overseeing planning, coordination, delivery tracking, and operational workflows
- Implemented structured MIS reporting with weekly and monthly execution reviews to improve visibility and decision-making
- Standardized workflows and operational controls across distributed teams, improving execution consistency and delivery adherence

- Coordinated across a 500+ stakeholder ecosystem including program teams, institutions, and operational contributors

Key Impact: Improved execution consistency by 30% through standardized operational frameworks and structured reporting mechanisms.

KEY PROJECTS – CONCURRENT MULTI-ORGANIZATION ENGAGEMENTS (2014–2022)

Program Operations Lead – Governance & Multi-Unit Execution	Multi-Organization Engagements	Jul 2014 – Jun 2022 Hybrid / Remote
• Led execution across 100+ operational units and 40+ locations — overseeing governance, stakeholder alignment, SOPs, and full delivery lifecycle across distributed environments • Established standardized reporting, review cycles, and execution controls to improve delivery consistency and SLA adherence across 3 concurrent program engagements (2017–2019) • Enabled leadership visibility through structured MIS reporting and execution monitoring — coordinating across 300+ institutions and 2000+ stakeholder ecosystem • Drove operational scaling through process standardization, structured workflows, and governance-led coordination — supporting 2000+ participants across multi-organization programs Key Impact: 100% on-time execution across 40+ locations · 2000+ stakeholders · 300+ institutions · 3 concurrent engagements.		

DIGITAL & EMERGING TECH EXPOSURE

- Developed Gen AI-based use cases for automated reporting and stakeholder communication
- Built Power BI dashboard for multi-unit performance tracking and SLA monitoring
- Configured Jira project for task tracking, governance workflows, and execution visibility
- Built sample workflows for AI-driven insights and performance summarization
